

AA

Soil Amendment

Granule Form

Ingredients: Zeolite, Volcanic mineral

Restore soil structure and improve soil fertility. Maintain soil acidity and soil alkalinity balance. Increases soil moisture and make soil soft and crumbly for good ventilation. Suitable for soil preparation before planting and adjusting soil deterioration after harvesting. Suitable for plant cultivation.

Suitable for	Dosage	Per	Usage
Soil preparation before planting field crops. 	 500 gram x 2	 1 Acre (4,000 m ²) cultivated area	Apply "AA" by broadcasting all over the planting area after harvest, flatten new planting plots or preparing new soil before planting then plow the soil.
Soil preparation before planting in rice paddy. 	 500 gram x 2	 1 Acre (4,000 m ²) cultivated area	Apply "AA" during tiling before rice planting by broadcasting evenly all over the rice field.
Soil preparation before planting vegetable garden. 	 500 gram x 2	 1 Acre or 100 gram / 400m ² (4,000 m ²) cultivated area	Apply "AA" during soil preparation by broadcasting all over the planting plot and mixed together or dig and apply into the planting hole before planting vegetable.
Mixed with fertilizers. 	 500 gram x 1	Per 50-100 kg. (1-2 sacks) of fertilizer 	Mix "AA" together with the fertilizer and broadcast all over the planting area.
Mix and prepare with planting material. 	 500 gram x 1	per 1 – 2 cubic (or 1000 – 2000 Kilo) 	Mix "AA" with planting materials such as rice husk, coconut coir, peat moss, etc. Mix well before use.

Recommendation: AA dosing rate per scoop,  teaspoon (5 g),  tablespoon (15 g),  serving spoon (20 g).

Remarks: Not recommended with water softener for sprinkler system use. Soil amendment "AA" contains mineral sludge that can clog the water nozzle.
